

# Preventive Cardiology Program

At Children's Healthcare of Atlanta Cardiology, our Preventive Cardiology Program provides a complete range of services for kids with conditions that place them at risk for early heart attack or stroke. When risk factors such as obesity, high cholesterol, diabetes and elevated blood pressure are properly treated—often with a healthy diet and exercise—early cardiovascular disease may be prevented.

**Michelle Wallace, MD**

Director, Preventive Cardiology  
*Clinic locations: Newnan, Stockbridge, Villa Rica*
